

## SUSTAINABLE PROJECTS

Sustainability is the ability of our Organisation or Club to continue its mission or program far into the future. All projects have to end eventually, but the project impact should continue. Rotaract have many programs, functions and roles which assist community to become empowered, and eventually attain sustainable development. United Nations had released 17 Sustainable Developmental Goals which can be taken as major areas of focus when implementing a project.

Sustainable Development has three major components:

- Economic growth
- Environmental stewardship and
- Social inclusion

Below are few accessible areas where a Rotaract Club can work for bringing a sustainable change,

- Conservation and protection of natural resources and efficient use of green energy
- Fighting climate change and following a way of life which can support climate change
- Raising the standard of living of the poor and developing them towards economic stability
- Working towards a literate society and there by inculcating them with new ideas and technological advancements
- Brining people out of poverty and in-debttness and fighting towards food security, good health and well being
